

Inland Technologies Acquires DJ Aviation Services

October 27, 2017

Truro, Nova Scotia, Canada: Inland Technologies Canada, a leading provider of airport environmental services and a member of the Inland Group of Companies, announces the acquisition of DJ Aviation Services of Calgary, Alberta.

DJ Aviation Services is a ground support specialist providing services at YYC in Calgary AB. Apart from de-icing, DJ Aviation Services also provides ground handling and security services. The company currently provides de-icing service for a number of carriers at Calgary International Airport.

“This acquisition expands our ability to service our clients in western Canada,” said Roger Langille, CEO of Inland Technologies. “DJ Aviation already has a strong reputation in Calgary, and together we can bolster our service provision through our larger network.”

The acquisition was completed on October 27, 2017. All operations with DJ Aviation Services existing clients will continue without interruption.

“The DJ team is excited to be coming onboard with Inland Technologies,” said Darrell Garton, owner of DJ Aviation Services. “We have enjoyed working with the Inland team in the past, and are looking forward to being part of the Inland family.” He adds, “This change will be a seamless transition for our clients, and we hope to expand on our services and better meet the needs of our clients.”

The Inland Group of companies, including Inland Technologies, Integrated Deicing Services, and Quantem Aviation Services, offer airport environmental compliance programs, aircraft de-icing, and ground support services. The Inland Group currently operates at more than 50 airports worldwide.
